1960 INDEX

CURRENT

THE SIGNIFICANT NEW MATERIAL

FROM ALL SOURCES

ON THE FRONTIER PROBLEMS OF TODAY

Current's FRONTIER PROBLEMS are basic in the sense that they seriously affect our democratic way of life, relevant in the sense that they take into account new knowledge in the physical and social sciences, open in the sense that they involve unanswered questions.

SIGNIFICANT NEW MATERIAL contains new information or new ideas or comes from an unexpected source or provides a better way of saying something.

CURRENT'S SOURCES of material are all-inclusive. They cover general and special periodicals; academic journals and proceedings of learned societies; books, pamphlets and reports from commercial publishers, universities, foundations and funds, citizen organizations and special interest groups; daily and Sunday newspapers, especially editorials, columns and features; television and radio commentators, interviews, forums; government and intergovernment sources; statements of opinion leaders.

SUBJECT AND AUTHOR INDEX
NUMBERS 1-8, MAY-DECEMBER, 1960

In the subject index, the entries in small capitals are frontier problems as defined by Current; lower-case entries are general subjects; italic entries are the monthly long verbatim extracts. Each entry includes the names of authors.

The author index lists the names of authors and organizations whose work was reprinted in Current. Entries give the original source and date of articles, the titles of books and pamphlets, and the place and date of delivery of addresses. Full details on original sources can be found in each issue of Current.

In both the subject and author index, the month in italics and the numeral following it refer to the issue and page of Current where the material can be found.
